FREMONT, CA – Today, Sapphire InfoTech announced that it was US Patent # US 7,478305 B2 title “Method and Apparatus for Interactive Generation of Device Response Templates and Analysis”

This is the heart of our intellectual property “TestSmart” which helps Network Engineers automate their work without any knowledge of programming. Using the response template the engineers can analyze the device output in the visual manner. This the normal way they do their manual testing. Once the task is done manually and recorded next time around it is done in real time.

About Sapphire InfoTech

Sapphire InfoTech is a Fremont; California based software Solutions Company that provides test automation and provisioning solutions for multiple industries. The company's initial offerings have already helped Telecom and Networking enterprises achieve faster product testing and certifications, lowering development time and expenses when compared to traditional testing methods. Sapphire InfoTech was founded in 2000.
