**FREMONT, CA** – Today, Sapphire InfoTech announced that it was US Patent # US 7,559,001 B2 title “Method and Apparatus for **Executing Commands and Generation of Automation Scripts and Test Cases**”

With this innovation Network Engineers will be able to build the Scripts for configuration and Testing as they do it manually on the interactive Telnet session. Network engineers need not have any skill of programming to build the automation scripts. Thus make their task easy and more efficient.

**About Sapphire InfoTech**

Sapphire InfoTech is a Fremont; California based software Solutions Company that provides test automation and provisioning solutions for multiple industries. The company's initial offerings have already helped Telecom and Networking enterprises achieve faster product testing and certifications, lowering development time and expenses when compared to traditional testing methods. Sapphire InfoTech was founded in 2000.
